

## **Neuroscience Colloquium**

## Winter Semester 2019/2020

Lectures are mostly\* held Thursdays, 5 p.m.

Venue: Paul Ehrlich Lecturehall, Virchowweg 4

Date	Guest	Title
24 Oct	Katja Nowick Institute for Biology - Zoology, Freie Universität Berlin, Germany	Evolution and networks of gene regulatory factors in the human brain
31 Oct	<b>Veronica Egger</b> Institute for Biology, University Regensburg, Germany	A confederation of independent mini- neurons: From local to global signalling in olfactory bulb granule cell dendrites
06 Nov* wed.	Johannes Letzkus Max Planck Institute for Brain Research, Frankfurt, Germany	Encoding of top-down information in mouse and human neocortex
21 Nov	Sabine Bahn Cambridge Centre for Neuropsychiatric Research, University of Cambridge, UK	Development of a combined digital and biomarker test for Bipolar Disorder
28 Nov	Berthold Hedwig Department of Zoology, University of Cambridge, UK	The neurobiology of singing and phonotaxis in crickets
12 Dec	Kate O'Connor-Giles Brown University, Department of Neuroscience, Providence, USA	Communication in neural circuits: from genes to synapse formation, function and plasticity
16 Jan	Loren Frank  Control  Control	Understanding the brain's model of the external world
30 Jan	Megan Carey Champalimaud Neuroscience, Lisbon, Portugal	Understanding the complex behaviors of the 'simple' cerebellar circuit
06 Feb	Camilla Bellone Department of Fundamental Neurosciences, University of Geneve, Switzerland	Neural circuit underlying social motivation
13 Feb	Tommaso Fellin Istituto Italiano di Tecnologia, Neuroscience (IIT Central Research Labs), Genova, Italy	Optical dissection of the thalamocortical circuits underlying the processing of sensory information in the mouse somatosensory system
20 Feb	Xiangmin Xu Department of Anatomy and Neurobiology, School of Medicine, University of California, Irvine, USA	Illuminating spatial learning and memory neural circuits in health and disease
